EDUCATION

Reykjavik University

B.S. in Computer Science, GPA: 8.73/10

Reykjavik

2013–2016

EXPERIENCE

Gangverk

Senior software developer, software architect, tech lead

Reykjavik

Aug 2018–Present

- Sotheby's Auction Engine
- Working with Sotheby's to digitalize their auction system. Focusing on developing highly scalable, resilient microservice architecture. Key challenges include, distributed caching strategies, microservice synchronization, metrics collection for identifying bottlenecks, database query optimizations, identifying error domains and error recovery.

Korta Payments

Software developer

Reykjavik

Sep 2016–Aug 2018

- Digital Payments
- Developing proprietary payment solution. Large focus on software security, hsm encryption, database optimizations, developing restful apis.

Icelandic Road and Coastal Administration

Software developer

Reykjavik

Jun 2016–April 2018

- Vegagerdin App
- Creator and maintainer of the official Icelandic road and costal administration app - Vegagerdin. The app processed road conditions recorded by weather stations across the country and displayed them on the map.
